Terminal Disclaimer

The terminal disclaimer filed on 12/20/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 09/937,074 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-14 and 35-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims 1 and 38 note that the applied indirect radiation is more than 50% of the total radiation output. It is unclear what is the source of the radiation output. Is it the total radiation of the sun? Is it from IR radiators used for heating?

In claim 6, there is no nexus between the IR radiation and the proportion of reflected radiation.

In claims 8 and 35-36, it is unclear in relation to what is the radiation percentages of 90%, 95%, or 98% are being compared to. Is it the radiation that impinges the surfaces of a space?

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference A has been cited to show that state of the art.
